

LAC-2006-01 WHOIS Privacy

Filtering of LACNIC's WHOIS Information

Proposal

ISPs shall provide LACNIC with classified information on the block delegations made to their clients having a range greater than 8 addresses (prefix /29). This information shall be published through the new WHOIS database, where the fields corresponding to contacts and users that might constitute information of a private nature shall be modified and eliminated.

LACNIC will have the right to request further information (information of a public nature or information authorized by the client) from the ISPs regarding their delegations. In turn, the ISPs may request that the information they provide not be of a public nature.

1. Currently, the information requested for an allocation is as follows:

- Name
- Person Responsible
- Postal Address
- ZIP Code
- City
- State
- Country
- Telephone Number
- Contact ID

2. The information requested for an ISP contact is as follows:

- Name
- E-mail
- Postal Address
- ZIP Code
- City
- State
- Country
- Language
- Telephone Number

LACNIC will always make public the following information for each block in the WHOIS database:

- Client Name
- Address Blocks

At the request of the IR, LACNIC shall eliminate the following client information from the WHOIS database:

- Contact ID
- Postal Address
- ZIP Code
- City
- State
- Country
- Telephone Number

The contact information may correspond to the data of a physical person or of a group of persons responsible for network administration. This data must always exist, and it is the responsibility of the registering organization to keep them updated.
