Juan Pablo León Aguilera

Ecuador

Brief biography.

Systems Engineer with extensive experience in telecommunications, having managed the Internet services for ETAPA EP, an ISP, for more than 10 years. I have also provided services to the National Electoral Council of Ecuador, where I served as technology consultant for the past presidential elections to ensure they were conducted in an ethical and transparent manner.

Tell us about yourself and your interests.

I consider myself a very responsible person who loves challenges and works passionately to achieve his goals. I also love to travel and get to know new places.

Family is an essential part of my life and I enjoy sharing great moments with them.

Tell us about your work experience, education and professional development.

Systems Engineer with extensive experience in telecommunications and computer security. I have been a university professor and managed several ISPs, I have served as advisor to multiple institutions, and this has helped me make a name for myself within the Internet community.

I have also been fortunate enough to provide technical advice to the National Electoral Council for the presidential elections recently held in Ecuador.

Tell us why you are interested in participating in LACNIC and your history with the organization.

I have been part of LACNIC since I began managing ETAPA EP's membership many years ago, and this has allowed me to be in permanent contact with LACNIC, to get to know the organization, and share with several of its members.

I have actively participated in different events, forums, training activities, etc. in different countries of the region.

What do you think of LACNIC, its mission, and the organization's role as a driver of growth and development in the region?

The Internet continues to grow and therefore involves multiple challenges for both operators and the professionals responsible for connecting the different users of the network.

To have an organization such as LACNIC that efficiently manages Internet numbering resources for Latin America and the Caribbean, that goes far beyond the assignment of IP addresses and also provides advice and training, that has become the meeting point for the Internet community, and that is a major reference for us professionals who have great responsibility, without neglecting network security, which must be strengthened by the joint work of the organization's members.

In your opinion, what would be your greatest contribution to LACNIC as a member should you be elected? What motivated you to run for a position on the elective body?

The fact that I am a professional with extensive technical experience in telecommunications and computer security, as well as my experience in the electoral field obtained while actively participating in the National Electoral Council of Ecuador, have allowed me to acquire the skills needed to be a part of LACNIC's Electoral Commission and respect the will of the organization's members by enforcing the regulations to guarantee the transparency and ethics of the organization's electoral processes.
