Tell us why you are interested in participating in LACNIC and your history with the organization.

In 2017 the Company for which I am currently working applied to join LACNIC. As I manage its autonomous system number as well as IPV4 and IPV6 addressing, I became aware of the ways in which I can participate and contribute to the Community as well as learn about different topics that will contribute to my professional and academic growth.

What do you think of LACNIC, its mission, and the organization's role as a driver of growth and development in the region?

1.- Vision: To see the organization actively engaged in the promotion of its services and in strengthening the moral and professional values of its members, working in a participatory manner so that the new generations will receive quality Internet services from their service providers.

2.- Mission:

To bring the use of the Internet to the Latin American Community in a responsible manner.

3.- Role of LACNIC as a factor for regional growth and development.

To the extent that Lacnic promotes the ethical and moral use of Internet services, especially in developing countries, it will also contribute to the preservation and survival of the human species in a world that is more dignified and full of hope with quality of life.

This is the reason why I decide to participate freely and actively in my professional and academic fields.

In your opinion, what would be your greatest contribution to LACNIC as a member should you be elected? What motivated you to run for a position on the elective body?

I understand that promoting myself has implications, which I will detail below:

1.- Passion: To develop the activities entrusted to me, not only as a spectator but also as a promoter, through initiatives that will contribute to reach LACNIC's objectives.

2.- Ethics: To maintain my moral values as well as the values of LACNIC.
