

Nancy Julia Cordova Gamarra

Perú

Brief biography.

I have a degree in Electronic Engineering from the National University of San Marcos, Peru.

I specialize in the design, implementation and operation of major IP network projects for the business, banking and government sectors, working with the largest telecommunications company in Peru. I also have experience in the operation of voice and data equipment. I am currently working in the IP Services department of the company I represent, where work is results-oriented and for which I currently manage all IPV4 and IPV6 resources.

We are one of our region's IPV6 implementation pioneers.

I am an active member of the LACNIC community, have subscribed to the various discussion lists, and attend LACNIC meetings, as I have been appointed my organization's membership contact.

I provide active support when handling security incidents involving the networks I manage. Likewise, I also provide support in handling any other type of incident where the company networks we manage are involved.

Tell us about yourself and your interests.

I am an Electronics Engineer with more than 20 years of experience in the Telecommunications market, mother of two beautiful children. I like to read and to travel with my family. I love adventure and growing as professional.

Tell us about your work experience, education and professional development.

IP Network specialist with more than 20 years of experience in the Telecommunications sector.

Actively participated in the evolution of IP networks, BA and corporate Internet services for the Telefónica group.

Part of the team migrating services from IPv4 to IPv6.

Responsible for managing Telefónica del Perú's AS.

Tell us why you are interested in participating in LACNIC and your history with the organization.

It was the year 2000 when I first became involved in managing the IP addresses used for Telefónica's network, before which our IPs and AS had been managed by ARIN. Years later, I began to attend LACNIC meetings, and became very interested as this was part of my work and the field in which my company worked.

What do you think of LACNIC, its mission, and the organization's role as a driver of growth and development in the region?

Regulating and developing Internet routing, security and management policies for the region.

Presenting policies for improving Internet operators' security, promoting IPV6 in the region.

Developing policies at each country's interconnection points and a Regional NAP (LACNIX ;-)), Internet Exchange for the region.

Regional authoritative DNS (Root DNS).

In your opinion, what would be your greatest contribution to LACNIC as a member should you be elected? What motivated you to run for a position on the elective body?

My experience and knowledge of policy management, operation and administration, as well as best practices in the use of the Internet.

Experience in the ISP sector.

Knowledge of the Internet business (BA, 3G/4G, HFC).

Active participation in my company (Telefónica del Perú) in the evolution of Internet services.
